James Geller

Professor at New Jersey Institute of Technology. Chair of the Department of Computer Science (since July 2012).

" Ankil was involved in working on the front-end of the SLOB project and web portal. He had to modify the existing software to correct errors, allow it to adapt to new hardware/platforms, and to improve its performance. Ankil also wrote the code to show the contents of a .OWL file on the webpage using XML parsing. Ankil did an excellent job on the programming with very little guidance. He has a really outstanding attitude and work ethic and I found it a pleasure to work with him.

TAMAAL ROY

CEO at Biomatiques Identification Solutions Pvt. Ltd.

" Ankil has worked with us previously, helping us in our algorithm building for IRIS recognition and IDENTIKIT application.
His diligence and hard working nature has been always appreciated.
He is and will be a asset to any organisation he works in.

"
